

Effective Emergency Response Systems

Help at the push of a button...

Providing A Vital Connection for You During an Emergency.

In an emergency you simply press the button you are wearing...we take care of the rest and you.

1 - Press Your Button

In an emergency press the button on your pendant or wristband. This will activate your alarm.

2 - Get a Professional Response

Your call will be answered within seconds by an operator who will know all of your contact information and be ready to assist you.

3 - Help is on the Way

Your operator can send rescue, family, friend, or neighbor. Once help is on the way we will start calling your contacts.

4 - Confirmation & Follow Up

We stay in touch with responders to make sure you got the help you need and inform your contacts of any changes.

No other product on the market today makes it easier to get help in an emergency than a emergency alert system!

The Emergency Alert System You
Want at a Price You Can Afford

Our emergency alert system is provided **FREE** for your use when you sign up for our emergency alert monitoring. Our Emergency Monitoring Facility is UL Listed and uses advanced technologies to provide a quicker response time and better communications.

There aren't a lot of fancy features that just end up causing a headache later on. It was designed for one purpose...to get you help when you need it. Every feature built into our emergency alert system was designed to provide you with the quickest response, the best voice quality, the ability to activate your alarm from any room in your home and to speak with us from further away.

All of these features come standard on our emergency alert system so you won't have to buy additional equipment just to get the same quality system.
